

Privacy Statement

Photo Authenticity Checker

Effective date: August 23, 2026

Last updated: August 23, 2026

Who we are

Photo Authenticity Checker is developed and operated by **Pramanik** ("we," "us," "our"). This Privacy Statement explains what happens to your data when you use the Photo Authenticity Checker app.

In this Privacy Statement, "you" or "your" refers to the person using the Photo Authenticity Checker app.

If you have questions about this statement or how your data is handled, contact us at contact@pramanik.ca.

What this app does

Photo Authenticity Checker lets you check whether a photo appears to be AI-generated or digitally tampered with, and returns a probabilistic result (Low / Medium / High probability) along with a plain-language disclaimer.

What data we collect

Photos you submit for scanning. When you select or share a photo with the app, it is uploaded to our server for the sole purpose of analysis. The photo is:

- Held in memory only for the duration of processing
- Forwarded to a third-party image analysis provider for authenticity detection (currently Sightengine; we may use other or additional providers over time)
- **Not stored** on our servers before, during, or after the scan
- Not used for any purpose other than generating your scan result

Device and network information. To prevent abuse of the service (for example, one device sending an excessive number of requests), we transiently process:

- Your IP address
- An optional device identifier sent by the app

This information is used only for rate-limiting and abuse prevention. It is not linked to your identity, not sold, and not used for advertising or tracking.

Accounts. The app does not currently require you to create an account, and we do not collect your name, email address, or other personal identifiers through the app itself. As the app grows, some features — for example, continued use beyond a free usage threshold — may require creating an account so we can manage your access to paid features. When that capability is introduced, we will update this Privacy Statement to describe what account information is collected and how it's used, before it takes effect.

Third-party processing

Photos submitted for analysis are sent to a third-party image analysis provider (currently Sightengine) to generate the authenticity score. We may add, remove, or change analysis providers over time as the app evolves. Each provider's own privacy practices govern their handling of this data during processing. We do not control and are not responsible for a provider's independent data practices; you can review Sightengine's policies directly at sightengine.com.

Child safety commitment

We are committed to preventing the distribution of child sexual abuse material (CSAM). We are integrating industry-standard CSAM detection technology to screen uploaded images and will report any confirmed matches to the National Center for Missing and Exploited Children (NCMEC), or the appropriate authority in your jurisdiction, as required by law. Content identified as apparent CSAM will never be stored, displayed, or returned to any user as a normal scan result.

What we don't do

- We do not sell your data
- We do not use your photos to train AI models
- We do not build advertising profiles
- We do not access your photo library beyond the specific image you choose to submit

Data retention

Because we do not store submitted photos, there is no image retention period to disclose — each photo exists on our server only for the seconds it takes to process the request. Rate-limiting data (IP addresses, device identifiers) is held only transiently in memory and is not persisted to long-term storage.

Your rights and choices

Since we do not currently maintain accounts or persistent records tied to individuals, there is generally no stored personal data to access, correct, or delete. If you have concerns about a specific interaction with the app, contact us at contact@pramanik.ca and we will look into it. Once account-based features are introduced, this section will be updated to describe how you can access, correct, or delete your account data.

Children's privacy

This app is not directed at children, and we do not knowingly collect personal information from children. If you believe a child has used this app in a way that raises a privacy concern, contact us at contact@pramanik.ca.

Changes to this statement

We may update this Privacy Statement as the app evolves — for example, as new features are added or our CSAM screening integration goes live. We will update the "Last updated" date above when changes are made. Material changes will be reflected here before they take effect.
